

## SOFTWARE DEVELOPMENT

**Year of foundation:**  
2000

**Headquarter:**  
Cluj-Napoca

**CEO:**  
Daniel Metz

**Number of employees:**  
260

### EBS offers support for all phases of software life cycle

For the development of high quality software, we have extensive knowledge in software technologies, as well as the functional comprehension of the corresponding application. Regardless whether we talk about internet- or client/server application, programming methods and -languages or database technology, our employees have at hand extensive know how, which is proven by experience.

### Know How profile

- MS.NET and J2EE including development tools and ClassLibraries
- Web applications like CMS, portals
- Web servers like MS-IIS, Apache
- Application servers like IBM Websphere, BEA WebLogic
- Programming languages: C++, C#, Visual Basic, Delphi, Java
- Data bases Oracle, SQL-Server, MySQL

### Service Portfolio

In the software development process, we take over the following responsibilities:

- Analysis
- Design
- Programming and Testing
- Documentation
- Quality assurance

### Nearshore guide line

The software development has project like characteristics and requires not only good development competencies and technological know how, but also development and project management processes. Our employees' long time experience in project and team leadership ensures the project development's success. Each project needs a concept which identifies analyses and schedules every phase involved in it. We've recognized and acknowledged this matter and developed our own methodology in order to comply with these requirements. This methodology establishes preparing measures for the project start and establish a comprehensive activities framework. This has to be respected during the entire project run. Next, there will be tools recommended in order to sustain the automation process and the efficient organization on the production layer.

### Your advantages

- Lower costs based on transfer
- Sound know how
- Flexibility (e.g. on changing resource requests during production)
- High quality of the work results
- Lower costs for quality assurance

## Extract from EBS's client list

Customer	Technology
Annotext, Düren	.Net 3.5, C#, SQL Server
Benteler, Paderborn	Java, Portlet, MySQL
Cirquent (BMW-Group), Munic	Java, Oracle
DaimlerChrysler Computing Services, Graz	Java, J2EE, Oracle
DATA GLOBAL, Gaildorf	Java, SQL
DKV Euroservice, Düsseldorf	Cobol Mainframe
GIP, Offenbach	ABAP, Natural
Gorbit, Essen	Java, MySQL
Hansalog, Ankum	.NET 3.5, ASP.Net, MS SQL
Lexware, Freiburg	Visual Studio 2005, C#, C++, Btrieve, Sybase, Access
Meacon, Stuttgart	.NET 2.0, 3.0, 3.5, SQL Server, Sharepoint
Sykosch, Schloß Holte-Stukenbrock	Delphi 4, Btrieve
